1. INTRODUCTION

Thank you for choosing a Link Mortuary Equipment HD150. We want to help you to get the best results from the deck and to operate it safely. This manual contains information to introduce you to the Link HD150 and to assist you with its installation. The manual is intended solely for use with this product.

All information in this manual is based on the latest information available at the time of printing. Link Manufacturing reserves the right to change its products or manuals at any time without notice. Contact Link Mortuary Equipment at (800) 248-3057 for information on recent changes to products.

Damaged components should be returned to Link with a pre-arranged Returned Goods Authorization (RGA) number through the Customer Service Department. The damaged component may then be replaced if in compliance with warranty conditions.

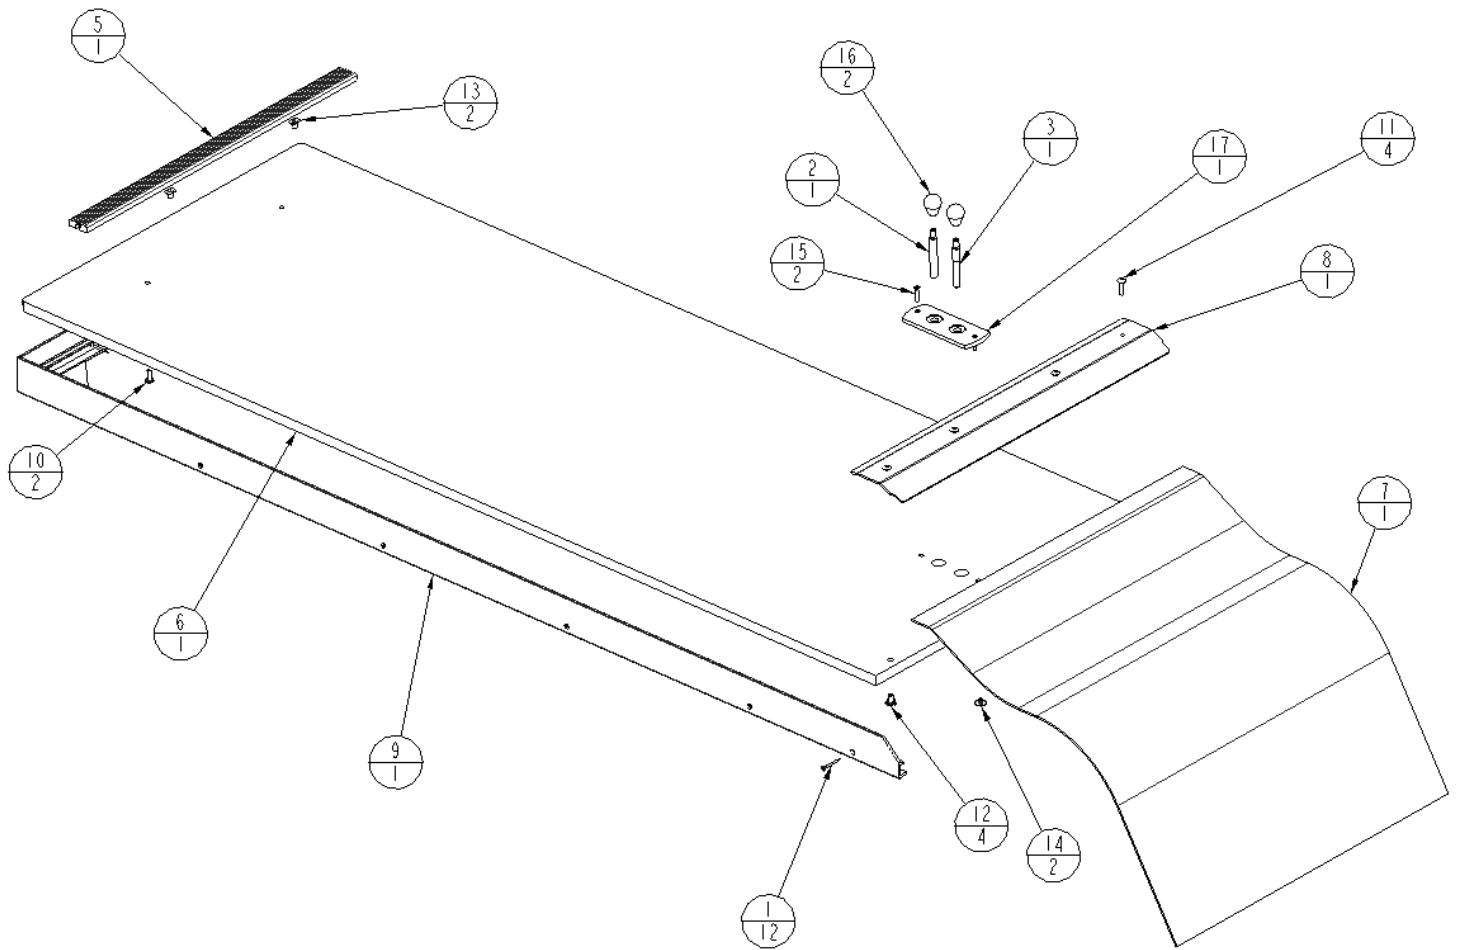

Review the **Parts List** below to become familiar with the different components of the **HD150**.

Installation:

- A.** The HD150 sits in the hearse and is secured in place by inserting the supplied pin (either Ø1/2" or Ø3/8" depending on the style of bier pin in the hearse) with the knob through the bier pin plate of the HD150 into the bier pin plate of the hearse. The position of the deck will vary depending on which holes are used. It is usually best to keep the deck as far back as possible while still being able to get the door closed.
- B.** A pair of Cot Post Tips has been included to replace the worn or missing tips from your cot. They will help keep the sharp edges of the cot legs from damaging the surface of the HD150. To install these tips, simply remove the old tips, insert the new tips, and lock them in place by tightening the screw on the bottom of the tip.

Maintenance:

- A.** Clean with soap and water.
- B.** Call Link Mfg. at 1-800-248-3057 with any questions or comments.
