LINK® DD2000-XLC

Double Deck System

Full-Size Cargo Van Double Deck System

The DD2000-XLC from Link fits in most full-size cargo vans. The engineered double deck system incorporates the capability to secure a standard and oversized cot side-by-side. The system allows four cremation containers, four cots, two air trays, or two caskets to be transported safely by one person.

The powered upper deck with safety latch raises and lowers within seconds, allowing you to easily load and transport. Interchangeable and adjustable bier pins allow the management of different casket sizes on both decks for nearly any job. Recessed cot cups allow for the safe secure of stretchers.

Robust features like aluminum deck surface, rugged fold down ramp, and engineered deck frame help create the most reliable and durable deck system in the industry.

TRANSPORTING CAPABILITIES

Increases the overall capacity of cargo vans by allowing for the transportation of either four stretchers, four cremation containers or two caskets.

FITS STANDARD & OVERSIZED COTS

The double deck fits a standard and oversized cot side-by-side, with a 50.5" upper deck and a 51.8" bottom deck.

POWERED UPPER DECK

The upper deck raises and lowers within seconds, allowing one person to easily load and transport cots, caskets or air trays.

DURABLE DECK AND GLIDE STRIPS

The aluminum deck with cot cups and glide strips makes loading easier while protecting the vehicle floor from damage.

UPPER DECK SAFETY LATCH

The upper deck safety latch prevents the deck from dropping if both powered actuators fail.

HIGH-IMPACT BUMPER RAMP

A fold down ramp protects the rear of your vehicle, as well as assist in loading and unloading mortuary cots and containers.

SPECIFICATIONS

	7226A000
WIDTH	65 INCHES
LENGTH	107 INCHES
MAXIMUM LOAD WIDTH*	52 INCHES
MAXIMUM LOAD LENGTH*	96 INCHES
UPPER DECK WEIGHT CAPACITY	600 LBS
BULKHEAD	REQUIRED

* Note: The upper deck has a maximum load width of 50.5 inches and a maximum load length of 89.75 inches.

VEHICLE FIT GUIDE

CHEVY EXPRESS	GMC SAVANA
DODGE PROMASTER	NISSAN NV
FORD ECONOLINE	MERCEDES-BENZ SPRINTER
FORD TRANSIT	

WARNING: Link products must be professionally installed by a trained technician when being placed into an Electric Vehicle (EV). Electric Vehicles have higher voltage batteries and cables and drilling into Electric Vehicles may cause serious bodily harm and possibly death. Link is not responsible for optional configurations or equipment that restrict the installation of this product in any way. Consult OEM body builder guides for additional installation guidelines.
